Community Facilities – Intermediate Care and Long-term Care)

Issuing Authority: Director General, Policy and Research

Effective Date: April 1, 2019

Document ID: 1914

Care has been taken to ensure these policies accurately reflect the acts and regulations. Should any inconsistencies be found, the acts and regulations will prevail.

Purpose

This policy provides direction on the provision of [intermediate care](#) under the Veterans Independence Program (VIP) and intermediate care and [chronic care](#) under the Long-term Care (LTC) Program with respect to:

1. community facilities (provincially subsidized beds, non provincially subsidized beds, and contract beds);
2. the cost of care payable to, or on behalf of, a Veteran in a community facility; and
3. the cost of care payable to, or on behalf of, a Veteran who chooses to transfer to an Alternate Care Setting (ACS).

Policy

General

1. For the purpose of this policy, the term "Veteran" is interpreted to include all individuals eligible for intermediate or chronic care (see paragraph 8).
2. If applicable, the term "Veteran" is deemed to include a duly authorized representative of the Veteran.
3. A "community facility" means a health care facility in Canada that is approved by the Minister and provides accommodation and meals and intermediate care or chronic care.
4. "Provincially subsidized beds" is a general term for the purposes of this policy and refers to those beds in which the province/territory:
 1. licenses, accredits, regulates, approves, etc., the bed to provide intermediate or chronic care;
 2. subsidizes the cost of care;

- 3.determines the amount a resident has to pay (co-payment) for such things as room and board, articles and services necessary for personal hygiene, etc., and
- 4.manages admission to the bed.
- 5.“Non provincially subsidized beds” is a general term for the purposes of this policy and refers to those beds in which the province/territory:
 - 1.licenses, accredits, regulates, approves, etc., the bed to provide intermediate or chronic care
 - 2.may or may not subsidize basic health-related costs;
 - 3.is not responsible for determining what a resident has to pay (co-payment) for such things as room and board, articles and services necessary for personal hygiene, etc., and
 - 4.may or may not manage admission to the bed.
- 6.A “contract bed” means a bed that is set aside in a community facility in accordance with a contractual arrangement entered into by the Minister to provide care to [Veteran pensioners](#), [income-qualified Veterans](#), [Overseas Service Veterans](#) and certain [Allied Veterans](#) (see policy entitled [Eligibility for Health Care Programs – Allied Veteran](#)).
- 7.An “accommodation and meals contribution” means the amount that a Veteran is required to pay for accommodation and meals while in receipt of intermediate care or chronic care (see policy entitled [Accommodation and Meals Contribution](#)).

Eligibility for Care

- 8.See [Eligibility for Health Care Programs – Eligible Client Groups](#) to determine who is eligible for intermediate care under the VIP or intermediate or chronic care under the LTC Program.
- 9.In cases where a Veteran’s eligibility is limited to intermediate care under the VIP, but the Veteran is assessed as requiring chronic care, a financial contribution for the provision of intermediate care may be approved. This applies whether the Veteran is admitted from home, is moved from one health facility to another or, upon assessment, his/her health care needs are deemed to have increased. The Veteran is responsible for the costs of any services to meet their health needs that exceed the VIP intermediate care financial contribution.

Admission

- 10.Admission to intermediate or chronic care shall be determined in accordance with either the "Long Term Care Program – Application and Decision Making Process" or the "VIP Intermediate Care Application Process", depending on the Veteran’s eligibility and health needs.

Cost of Care

11. Subject to the applicable rates prescribed in the Veterans Health Care Regulations and the Veteran's eligibility for care in a community facility, the Department may pay:

1. the full cost of care based on a provincially subsidized bed rate;
2. the rate charged to a provincial resident in respect to care that is in a non provincially subsidized bed;
3. either of the above rates less the amount, if any, payable by the Veteran for accommodation and meals; or
4. the rate approved by the Minister for a contract bed less the amount, if any, payable by the Veteran for accommodation and meals.

12. The cost of care payable with respect to intermediate care or chronic care provided to a Veteran in either a provincially subsidized or non-subsidized bed is determined in accordance with the "Maximum Rates Payable for Veterans Independence Program and Long Term Care Program Services". For circumstances in which the rates may be exceeded, refer to the policy entitled [Exceeding Rates for Veterans Independence Program \(VIP\) and Long Term Care \(LTC\)](#).

13. The cost of care may be paid when a Veteran is admitted to a community facility for either:

1. health reasons; or
2. respite purposes (see [Respite Care policy](#)).

Effective Date of Payment or Reimbursement

14. The effective date from which a Veteran is eligible for the payment or reimbursement of the cost of care by the Department is the later of:

1. the date that the Veteran first contacts the Department for the care, or
2. the date that the Veteran is admitted for care.

15. Where circumstances beyond the Veteran's control (e.g. urgent placement) prevent the Veteran from notifying the Department that he/she has been admitted to care, VAC may reimburse or pay the cost of care back to the date of admission. Payment or reimbursement of the cost of care is subject to section 34.1 of the Veterans Health Care Regulations and, therefore, limited to a maximum period of 18 months.

Provincially Subsidized Beds

16. The Department will fund the full cost of care as well as the Accommodation and Meals Contribution in provincially subsidized beds for:

1. [Veteran pensioners](#), [civilian pensioners](#), [special duty service pensioners](#), [military service pensioners](#), and former members or reserve force members of the Canadian Armed Forces who

are [entitled to a disability award](#), if the care is required as a result of a disability benefits entitled condition, and
2. Veteran pensioners and civilian pensioners who are seriously disabled.

17. All other Veterans may receive a financial contribution towards the cost of care (depending on eligibility) in a provincially subsidized bed up to the maximum rate charged by the province for a provincial resident, less the amount, if any, payable for accommodation and meals.

Non Provincially Subsidized Beds

18. The Department will provide a contribution toward the cost of care in a non provincially subsidized bed, less the amount, if any, payable for accommodation and meals, if:

1. the Veteran urgently requires the care; that is the individual's care needs are such that immediate action is required, e.g., health and safety is at risk in their current environment;
2. there are no provincially subsidized beds providing the required level of care available in the Veteran's community; and
3. the Field Nursing Services Officer has confirmed that the facility has the capacity to meet the care requirements. Where the Field Nursing Services Officer determines that the Veteran's health has deteriorated to the point where the facility can no longer meet the care requirements, the individual and his/her family should be counselled with a recommendation that the Veteran be transferred to another more appropriate facility.

Where the cost exceeds a provincially subsidized bed, the Department will contribute up to the maximum cost for the lowest-priced, non provincially subsidized bed available in the Veteran's community.

19. The funding provided by the Department to access a non provincially subsidized bed should not exceed that charged by the facility for a provincial resident. If the rate charged for the non provincially subsidized bed exceeds the maximum rate payable, or if it is considerably higher than that charged by other health care facilities in the same community for the same level of care, a review of the services provided should take place to determine if any of the charges are the responsibility of the Veteran. For example, the Veteran is responsible to pay for any items or services (non-necessities) that would not be covered in a provincially subsidized bed (e.g. cable television and telephone hookup charges; fees for private garden plots; surcharge for private room when selected by the Veteran).

Veteran Chooses Admission or is Residing in a Non Provincially Subsidized Bed

20.If a Veteran chooses to be admitted to a non provincially subsidized bed (regardless if the individual is at his/her principal residence, in hospital, in a transitional bed or is already residing in a non provincially subsidized bed); the Department will pay the amount that would have been paid if the Veteran had been admitted to a provincially subsidized bed. The Veteran is responsible for all other costs, including the applicable Accommodation and Meals Contribution.

Kinds of Accommodation Payable for Care

21.Payment for accommodations for care cannot exceed standard ward rates, unless the criteria in paragraph 22 are met. "Standard ward rate" refers to the lowest rate available in the facility.

22.The cost of care above standard ward rates may be approved by the Field Nursing Services Officer if:

- 1.there is no standard ward rate accommodation available in the facility providing the required care (in this situation payment of the cost of care above standard ward rates should only be made until a standard ward rate accommodation becomes available); or
- 2.the Veteran's treating physician states that, for medical reasons, a bed other than in a standard ward is required, and the Field Nursing Services Officer agrees with the physician's recommendation.

23.In such cases, costs above the standard ward rate may be paid less the amount, if any, payable by for accommodation and meals.

24.If a Veteran, solely as a matter of preference, chooses accommodations above the standard ward rate, the Department will pay only up to the standard ward rate less the amount, if any, payable for accommodation and meals.

Benefits and Services

25.The Department does not pay for additional nursing or personal care services for a Veteran receiving intermediate or chronic care in a facility. The level and intensity of care required should be included in the facility charge.

26.The Department does not pay for equipment, medical supplies, etc., that are normally expected to be included in the facility charge. See the following policies for more details: [Medical Supplies – General \(POC 7\)](#); and [Equipment \(POC 13\)](#).

Discharge

27.Discharge from care may occur:

- 1.if the Veteran no longer wishes to remain in care;

2. at the end of a period of respite care;
3. if the Veteran no longer requires the care, as confirmed through reassessment; or
4. if the Veteran moves to acute or palliative care.

Veteran in receipt of Intermediate or Chronic Care Chooses to Transfer to an Alternate Care Setting (ACS)

28. The provisions of this section of the policy are limited solely to those Veterans who are already accommodated in a community facility and who decide to transfer to an ACS. The policy does not apply to those Veterans who are in a hospital, in respite care, in a transitional bed, etc., awaiting admission to a community facility.

29. An ACS refers to a facility that is not licensed by the province to provide intermediate or chronic care. An ACS may be registered with the province or a self-regulating organization but is not equivalent to a long-term care facility within the provincial health care system. There is no oversight in respect to monitoring the care provided insofar as compliance with provincial long-term care legislation, policies and guidelines. For the purpose of this policy, an ACS may include, but is not limited to, a retirement home, assisted living, supportive housing, or a nursing home.

30. The Department recognizes that some Veterans may prefer an ACS to their accommodation in a community facility. This policy recognizes extending those individuals that freedom of choice. The Department will counsel the Veteran that the ACS should have the capacity to deliver the care to meet their assessed needs.

31. When a Veteran chooses to transfer to an ACS, the Department will maintain its financial contribution to the cost of care at the current rate, or the rate of the ACS, whichever is less. The funding by the Department at the time of transfer is the amount that will continue in subsequent years; the funding from the Department will not increase.

32. The Veteran continues to be responsible for paying the applicable Accommodation and Meals Contribution when in care at the ACS.

If the Alternate Care Facility Cannot Meet the Veteran's Health Needs

33. When the Department determines that an ACS does not have the capacity to deliver the care to meet a Veteran's assessed needs, it shall advise the individual and recommend that they remain at the community facility or transfer to an ACS with the capacity to meet their needs. If, contrary to that advice, the Veteran or other qualified person chooses to transfer to the ACS, the Department will require the individual to sign an Acknowledgement, Waiver and Certificate of Independent Legal Advice before undertaking any financial contribution with respect to the transfer to the ACS.

Alternate Care Facility Considered a Principal Residence

34. Veterans who transfer to an ACS may choose to consider the ACS as their [Principal Residence](#). In these cases, the Veteran would be eligible for certain Home Care services under the VIP, subject to the Home Care Services policy.

35. Veterans in receipt of funding for VIP Home Care Service are not eligible for funding for VIP Intermediate Care or for the LTC program.

- **Adult Residential Care in Community Facilities**

Veterans who were approved for ARC prior to its termination, July 1, 1993, were grandfathered for this care.

Issuing Authority: Director General, Policy

Effective Date: December 11, 2012

Document ID: 1006

Care has been taken to ensure these policies accurately reflect the acts and regulations. Should any inconsistencies be found, the acts and regulations will prevail.

Purpose

This policy provides direction on the continuation of [adult residential care \(ARC\)](#) to clients in community facilities after June 30, 1993, under the [Veterans Health Care Regulations](#) (VHCR).

Policy

General

1. ARC in community facilities was provided as a Veterans Independence Program (VIP) service to eligible clients until June 30, 1993. Effective July 1, 1993, ARC was removed as a VIP service. Clients who were approved for ARC prior to its termination, July 1, 1993, were grandfathered for this care.
2. This policy also provides direction on how the grandfather provision applies not only to clients receiving ARC service on June 30, 1993, but also to clients receiving [intermediate care service](#) on June 30, 1993, who might later require ARC in a community facility, as they were already in receipt of the basic elements of ARC service as part of their intermediate care service.

Eligible Clients

3. The following clients may receive ARC in community facilities after June 30, 1993:
 1. clients with contribution arrangements in effect on June 30, 1993, authorizing the provision of ARC;
 2. clients whose applications for ARC in community facilities, received as of June 30, 1993, were subsequently approved;
 3. clients receiving Intermediate Care Service on June 30, 1993, if:
 1. an assessment indicates that the provision of ARC would be a more appropriate response to their health needs; and
 2. they meet the approval conditions as outlined in paragraph 4; and
 4. clients in receipt of ARC in community facilities on June 30, 1993, who, after that date, require Intermediate Care Service and who subsequently improve to the point that:
 1. an assessment indicates the provision of ARC is once again the most appropriate response to their health needs; and
 2. they meet the approval conditions outlined in paragraph 4.

Approval Conditions

4. The clients noted in paragraph 3 may receive ARC in community facilities after June 30, 1993, if:
 1. they continue without interruption to require and receive this care, and
 2. they continue to meet VIP eligibility criteria.
5. ARC cannot be provided to clients after June 30, 1993, if, after that date:
 1. they lose the eligibility through which they initially gained access to the provision of this care in a community facility, and they do not meet the eligibility criteria of any other VIP eligible client group; or
 2. there is an interruption in the provision of the care (e.g. client discharges from the facility). A client who transfers from one facility to another is not considered to have an interruption of care.

Rate

6. The maximum rate payable for the continuation of ARC in community facilities after June 30, 1993, is provided in Maximum

Rates Payable for Veterans Independence Program and Long Term Care Program Services.

Accommodations and Meals

7. Clients who are eligible to continue receiving ARC in community facilities after June 30, 1993, must continue to pay up to the maximum [accommodation and meal rate](#) (see [Accommodation and Meals Contribution](#) policy).

Miscellaneous

8. Clients who are eligible to continue receiving ARC in community facilities are eligible to receive the costs of transportation incurred in Canada if transferred from one health care facility to another for medical reasons. (See [Health-related Travel](#) policy.)

A mysterious explosion left a crater in a German field. It may have been a WWII bomb.

Washington Post

From the air, the massive crater resembles a pink virus floating against a pool of green. But from the ground, the destruction is clear and devastating: A 33-foot wide, 13-foot gouge into the earth that began in the 1940s with an Allied sortie and ended recently in a massive blast in a barley field in central Germany. A bridge made of grass

BBC News

Every year, the last remaining Inca rope bridge still in use is cast down and a new one erected across the Apurimac river in the Cusco region of Peru. The Q'eswachaka bridge is woven by hand and has been in place for at least 600 years. Once part of the network that linked the most important cities and towns of the Inca empire, it was declared a World Heritage Site by Unesco in 2013. [READ MORE](#)

Musée militaire: trois héros d'ici mis en lumière

L'Hebdo Journal

Saviez-vous que le Général Jean-Victor Allard a été le seul Canadien à commander une Division britannique? Ou encore que le caporal Raoul St-Louis a effectué des traversées de la rivière Melfa en ambulance blindée pour secourir 15 hommes sous les tirs intenses des mitrailleuses et de mortiers et des bombardements? Et que le brigadier-général Fernand L. Caron, est resté pendant 10 mois au front sans se faire relever, ce qui constitue un exploit? [LIRE PLUS](#)

World War III: The secret underground nuclear bunkers hiding below forest revealed

[Express.co.uk](https://www.express.co.uk)

Known to the British and U.S. spies as “Object 1180” these two structures were built in 1985 — at the height of the Cold War. As the threat of a nuclear strike from either side seemed more than likely, high-ranking officers needed somewhere to orchestrate their retaliation and prepare for a second strike. As a result, the cylinders were built with thick walls to withstand a direct nuclear hit and an entire city was concealed below with shops, hospitals and a vast amount of supplies to provide the generals with everything they needed. [EPE is removing soldiers from the danger zone](#)

Australian Defence Magazine

EPE, a Brisbane company that develops technologies that allow soldiers to detect mines and dangerous substances from a distance, has secured \$300,000 through the Defence Innovation Hub. “EPE is an Australian SME which is working to protect and save lives on the international stage,” Minister for Defence Industry Melissa Price said in a statement. “Small- and medium-sized firms are every bit a part of our defence industry as our major partners. This funding will help EPE to improve its radar technology used to identify and track IEDs.” [READ MORE](#)
